AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

- 1-21. (Withdrawn)
- (Currently amended) A projection system comprising, a screen.

a projection unit separate from and optically coupled to the screen,
wherein the projection unit is operatively connected to a projection television cabinet,
a plurality of beacon dots positioned about the periphery of the screen,
a detection system optically coupled to the screen and the plurality of
beacon dots, and

a deflection shaping system operably coupled to the projection unit and the detection system.

- (Original) The projection system of claim 22 wherein the detection system includes a photocell and a lens coupled to the photocell.
- (Original) The projection system of claim 23 wherein the lens is a fish eye lens.
- 25. (Original) The projection system of claim 23 wherein the lens is an insect eye lens.
- 26. (Original) The projection system of claim 22 wherein the detection system comprises an optical element and a detector element comprising an array of

photodetectors, the optical element being adapted to map a plurality of regions of measurement (ROMs) onto the detector element.

- (Original) The projection system of claim 26 wherein the optical element comprises an array of lenses.
- (Original) The projection system of claim 27 wherein the lenses are convex and hexagonal.
- (Original) The projection system of claim 27 wherein the lenses are

 Fresnel lenses
- (Original) The projection system of claim 26 wherein the optical element comprises a hologram.
 - 31 43. (Withdrawn)
- (Previously presented) The projection system of claim 22 wherein the deflection shaping system further comprises deflection shaping circuitry used to maneuver a CRT beam.
- 45. (Previously presented) The projection system of claim 22 wherein the deflection shaping system further comprises at least one positioning device operatively connected to said projection unit.
